

Basic training Maintenance and repair work on KITO® devices

Completion of the basic training course is a prerequisite for servicing KITO® safety devices. Here you will learn everything about the general conditions and technical details for maintaining and repairing KITO® devices.

Training content

- General information – legal requirements
- Static dry flame arresters
- In-Line Detonation and deflagration arresters
- Static wet flame arresters
- Liquid seals
- Ventilation hoods
- Maintenance work on valve discs and valve seats
- Pressure/Vacuum relief valves

The training course concludes with an assessment of learning objectives and the presentation of a certificate.
